

STORMAWAY™

Want to keep stormwater costs from going down the drain?

Save time. Save money. Choose STORMAWAY™
Stormwater Management Systems from AIL.

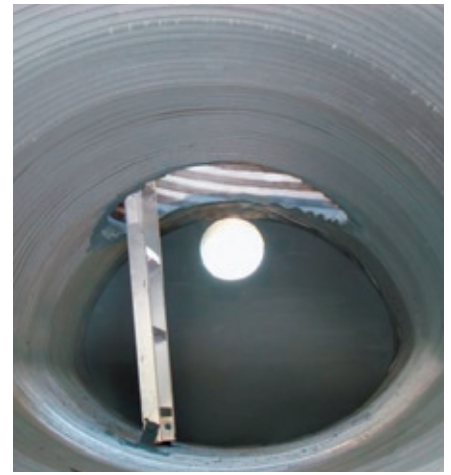

Stormwater management systems can add unexpected costs and delays to urban development projects if not done correctly. AIL's custom-designed STORMAWAY™ Systems are turn-key solutions you can depend on.

- ▶ Low material and installation costs ▶ Fast and easy to install
- ▶ Complete design flexibility ▶ 50 to 100+ year design service life
- ▶ Available in galvanized, aluminized type 2 and polymer coatings
- ▶ Ideal for detention, retention and recharge systems
- ▶ Full design and engineering support

Atlantic Industries Limited
We Support You.

The considerable cost advantages of AIL's STORMAWAY™ Systems have made them a top choice in the industry.

Underground stormwater management measures have become a standard practice in urban developments for the quantitative and qualitative impacts of stormwater runoff. The versatility of the corrugated steel pipe construction in the STORMAWAY™ Systems provides virtually limitless solutions to: match individual site requirements; maximize land value; lower site development costs, and; limit liability. Accessories include prefabricated manholes, ladders, litter screens, weir walls, orifice plates, inlet and outlet connections.

STORMAWAY™ Systems are ideal for:

- ▶ Parking lots
- ▶ Shopping centres
- ▶ Residential developments
- ▶ Schools, institutions
- ▶ Golf courses
