Corrugated Steel Pipe order sea-ships to Rankin Inlet for mine road construction

AIL recently supplied a large order of Corrugated Steel Pipe (CSP) to be used in construction of exploration and haul roads for a mine near Rankin Inlet in Nunavut.

Our manufacturing and logistics teams worked very closely with our associate dealer, Marcel Baril, to ensure that all product reached the Becancour Port in time for the scheduled fall sea shipment to Nunavut. This entailed adding some additional shifts and optimizing the logistics of several trailer loads from our Louiseville, Quebec, facility.

Project at a glance:

Project Name: Nunavut Mine Road Construction

Location: Rankin Inlet, Nunavut

Dealer Associate: Marcel Baril

Product: Corrugated Steel Pipe

Application: Drainage

Sector: Northern, Mining & Energy

PROJECT PROFILE

AIL no stranger to supplying Northern projects

As a leader in providing solutions and products to the North, we understand the unique requirements of Northern construction projects and the various stakeholders involved. Recent projects have included:

- 18 Bolt-A-Bin Abutment Systems and 15 trailer loads of CSP for Nunavut
- Two Bolt-A-Plate manway vent shafts for Nunavik
- Four sets of Bolt-A-Bin Abutment Systems for Baffin Island

We specialize in value engineering infrastructure solutions for specific sites and, with locations and teams across Canada, we are well-poised to work with your project group and deliver the best solution for your budget and application.

Build in value with a trusted Northern project partner; contact one of our Northern Infrastructure Specialists at 1-877-245-7473.
